

VTS - Plasma Cutting Systems

Providing high accelerations while maintaining excellent cutting quality.

Award-Winning Service!

Summary

Veracity combines Hypertherm plasma system components with proven mecha-tronic products from industry-leading automation suppliers. Its third generation design unites cutting edge performance, maintainability, and reliability.

About Us

Our experience is from more than twenty years in the plasma business, from technical to R&D, our design team and management holistically have experience that has seen what works and what does not. Our mission: to make a superior product and deliver excellent and on time post-sale support.

System Configurations

Below are the standard configurations of our system.

Effective Cut Width	6.0'	8.0'	10.0'	12.0'	14.0'
---------------------	------	------	-------	-------	-------

*Cut lengths from 12ft to approximately 200ft are available.

“My team had a great experience with VTS. From the sales consultation to the install, we felt like we were in great hands. Our process is now over four times faster, and we are able to utilize 36% more material per plate.”

*- David Arendt
Zodiac Aerospace*

Key Advantages

- Industry leading Reliability
- Designed around ease of Maintenance
- Impressive Accelerations
- High-Velocity between cuts
- Hand Assembled Made in the U.S.A

See backside...

What happens after the Sale?

- ◆ Does the OEM stock replacement parts? What if an international made replacement part malfunctions? Can your production afford down time?
- ◆ Is the machine builder providing post-sale support: phone support and on-site technicians? If so...how much does that cost after warranty?
- ◆ Does the manufacturer develop cost minimizers or a quality product? And to what degree is that strive for excellence?
(Servo motors, cable connectors, terminal blocks, fastening clips?)

Let's walk through these things together...Give Us a Call!

Three Reasons why you Should Consider Us

We understand that you have many choices to make and many options to compare. There are a few key **value drivers** that we have designed into our machine.

Ease of Mind with Industry Leading Reliability

Veracity Technical Services believes in **continuous improvement** and innovation. With ongoing efforts, we investigate areas of improvement while taking pride in an American made system. With above 95% satisfaction rating, you can **take comfort** in a **reliable process**. Futuristic materials and inputs make this possible for VTS.

Increase your Production with Faster Throughput

Our full-featured package uses Hypertherm's proven technologies to increase production by optimizing your entire process. Benefit from gains of up to 100% improvement in **parts cut per hour** by minimizing cut-to-cut cycle time using Rapid Part™ technology. Experience a drivetrain that drives production, **elevates throughput**, and accelerates your business.

Maintainable Design decreases Downtime

Our years of diverse machine support drive our parts selection and engineering. Although utilizing high quality parts in critical wear areas, we know that even those parts need to be serviced and eventually replaced. When that time comes, you'll appreciate the **ease of access** our machines provide. **Less time and hassle** means improved maintenance compliance and **faster repairs**.
